

Contract Risk Radar

See the risk in any contract in seconds.

Track 2 • Enterprise Operations (Legal)

Built with OpenAI Agents SDK + Codex

100% synthetic data

Contract review is slow, costly and inconsistent

Hours

of skilled time to read a single contract clause by clause.

Bottleneck

legal is a gate every deal must wait behind.

One clause

missed — uncapped liability, auto-renewal — costs real money.

Most reviews are repetitive checks against the same standard positions — perfect for an agent to do first.

Four agents, every flag pinned to the wording

1

Intake

Title, counterparty and key commercial terms.

2

Risk

Risky clauses with severity, a verbatim citation and a redline.

3

Score

Deal risk computed from the findings.

4

Advice

Sign / negotiate / escalate + negotiation points.

Guardrail: the reviewer approves, overrides the route or escalates — nothing is auto-signed.

WHAT THE JUDGES SEE

Paste a contract, see the risk light up

Inline highlights

Risky clauses highlighted in the document; click a finding to jump to the exact words.

Redlines ready

Each issue ships with concrete replacement language to copy.

Decide & act

Risk score, recommendation, and a cover note generated for the counterparty.

From hours to minutes, consistently

Hours → min

first-pass review of a standard contract.

Cited

every flag tied to verbatim text — auditable, not a black box.

Consistent

the same playbook applied to every contract.

Scale: NDAs, MSAs, vendor and procurement contracts; plug into your CLM and clause library.

See the risk before you sign it.
